HSM – The Company

Your experts for data protection

If you want to protect data securely, you need products you can trust completely. That is why with every HSM document shredder, you get a machine with our extensive experience and expertise built-in to it.

We are at the forefront with our wide scope of products: our balanced product range makes us a popular partner for security in the home office, in company offices or departments or in archives. There is no doubt about it: if you need to destroy personal data and confidential documents efficiently and easily in accordance with GDPR, we have the right product, whatever your requirement.

Founder and CEO Hermann Schwelling (centre) together with the shareholders Christina Schwelling and Harald Schwelling.

A success story for over 50 years

What we value and what gives you more value: a creative spirit, extensive know-how, commitment to quality and excellent customer service all from one source. Since Hermann Schwelling founded the company in 1971, we have developed from a small machinery plant in South Germany to one of the global market leaders for document shredders. We want all our customers to benefit from the proven HSM “Made in Germany” quality, manufactured in our plants in Salem, Frickingen and Reichenbach.

We are committed to Germany as a location. We have approximately 900 employees world-wide. Every single HSM document shredder holds a combination of decades of experience and the focused passion of our highly trained specialists and managers. “Great Products, Great People” for shared success, 100 percent quality and your satisfaction – guaranteed.

HSM Quality

Manufacturing depth across the board

Ever since the early years of the company, we have concentrated on our core competences of shredding and presses. Our quality concept has always been based on German manufacture. "Made in Germany" is synonymous with "Made by HSM". We have a unique manufacturing depth: from the blank to the precision cutting roller, from the first idea to the finished document shredder, from the development and design through

production and project planning – all the way to the service. We put the emphasis on competence across the board. We are in the driving seat, keeping our company on the quality track. You benefit from HSM's high degree of precision, the long operating life of our equipment and an optimum price-performance ratio.

All HSM plants have DIN EN ISO 9001 certification and strive to manufacture sustainable products.

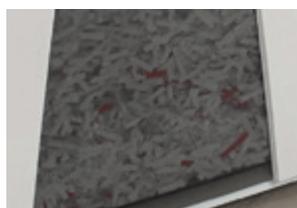

Made by HSM: due to the manufacturing depth in its own plants, HSM can always guarantee the very best product quality.

More than the sum of good single components: proven HSM quality

Using the HSM SECURIO P36i
as an example

Document shredder
assembly

- 1 Robust:** hardened solid steel cutting rollers (with lifetime warranty in security levels P-2 to P-5).
- 2 Powerful:** integrated automatic oiler provides for consistently high cutting capacity.

- 3 Practical:** the filling level of the waste container can be seen at all times through the inspection window.
- 4 Innovative:** the intuitive operation and menu selection via the high resolution touch display.

- 5 Intelligent:** The innovative IntelligentDrive motor and operating technology offers Silent, Standard and Performance operating modes for destroying data efficiently and conveniently.
- 6 Solid and durable:** the document shredder has a high-quality and robust wooden cabinet with an extra large door opening angle and can easily be moved on castors.

Sustainability

Good for the environment, good for you

We are very aware of our responsibility. That is why we manufacture products with a long operating life, which are already energy-efficient and which will not lose their value tomorrow. Every day we take small steps to get even more sustainable results in our production process, in our material selection and in energy consumption: our transport and outer packaging are made from re-usable materials and we recycle metal and plastic manufacturing waste. Since we do not use composite materials,

we only have single-source waste material. Moreover, we only use environmentally friendly, recyclable auxiliary and operating materials. We manufacture as sustainably as possible and always consider the environment in our processes. Nothing is closer to our hearts than preserving our environment and climate for future generations.

HSM Products are environmentally friendly

- The HSM SECURIO AF100 / C14 / C16 and HSM Pure 120 / 220 document shredders use no electricity in stand-by.
- Thanks to the EcoSmart energy management system, the HSM SECURIO AF150 to AF500 and C18 to P44i document shredders automatically switch to stand-by mode after two minutes and are therefore always ready to use. In this mode, the power consumption is less than 0.1 W.
- The HSM Pure shredders feature an energy management system and save power in stand-by mode.
- The HSM Powerline heavy duty document shredders and shredder baler combinations use motors compliant with energy-efficiency class IE3.
- The HSM StoreEx data media shredders have particularly powerful and energy-efficient drives and are designed for quiet continuous operation.
- HSM ProfiPack packaging machines turn used cardboard into high-quality packaging material, thus saving valuable resources.

Social and ecological commitment

We always strive to do our part for the future which is why we support a range of social and environmental projects. HSM therefore gets involved in a range of local, regional and global projects, associations, and support organisations.

HSM SECURIO awarded the Blue Angel

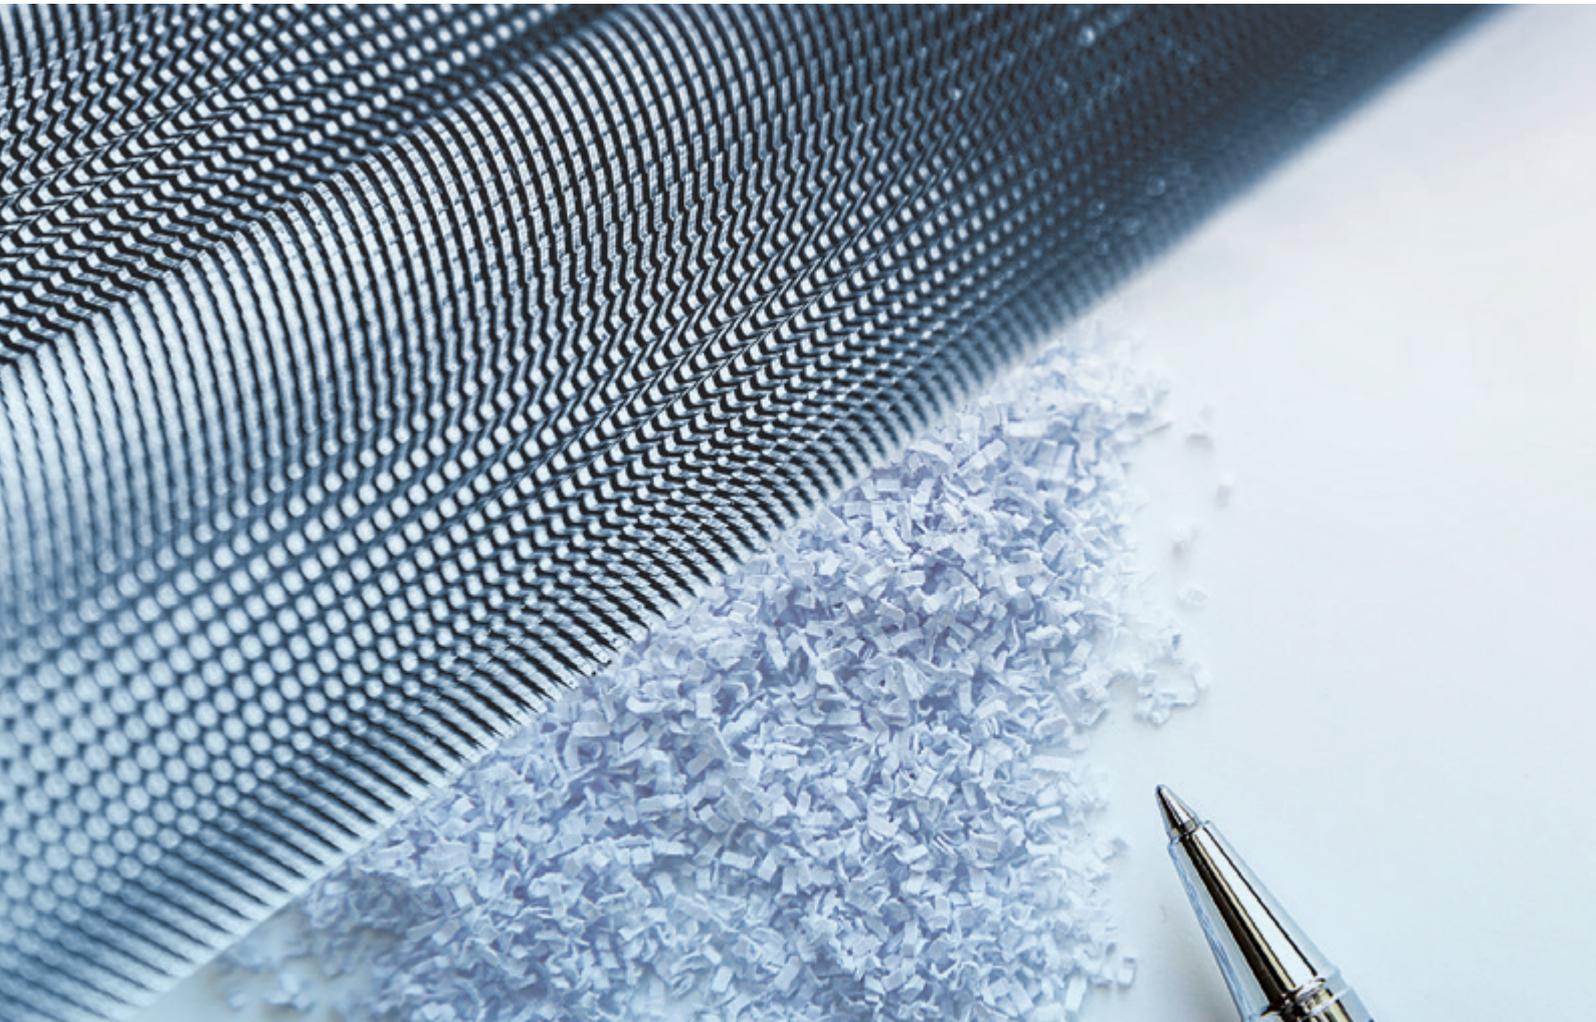

www.blauer-engel.de/uz174

HSM shredders are characterized by low energy consumption, durable design and the avoidance of materials that are harmful to the environment. These were the reasons that document shredders from the HSM SECURIO product range were awarded the Blue Angel certificate. We are particularly proud of this.

Learn more about this certificate:

Shred securely

It is more important than ever to protect data

No week passes without a report of personal or confidential data ending up in the wrong hands. The consequences range from significant financial losses to a loss of honour and reputation – both privately and in the business world. Although data protection laws such as the General Data Protection Regulation (GDPR), in force in Germany and Europe since May 2018, oblige parties to handle personal data correctly and should therefore prevent data misuse, a major effort is still required: there is often no consistent concept or data protection

endeavours are too superficial. This is obvious when bank statements end up in the street while the bank is being renovated, lists with the marks from final school exams or patient medical reports are found in public paper containers. Don't be the one responsible for something like that.

HSM offers a tremendous range of document shredders

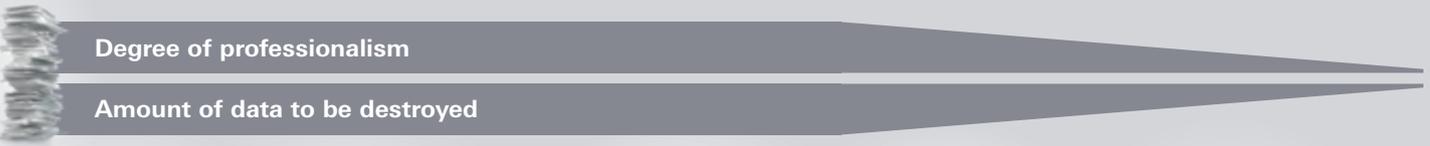

Do you need a compact document shredder for use at home, a central machine for an open-plan office, a complete disposal station for large quantities of documents or a shredder for your digital data media?

In the HSM product ranges SECURIO, Pure, shredstar, Powerline and StoreEx you will find the machine to match your requirement. In every price class, at every security level, for every performance requirement and handling every type of data media.

Industry / Authorities / Companies

SMEs

Private users

HSM Powerline / HSM StoreEx

Heavy-duty document shredders, shredder baler combinations or data media shredders for commercial operators.

HSM SECURIO

The premium shredder line for all users with the highest standards.

HSM Pure

The document shredders for SMEs, traders, the self-employed and contractors.

HSM shredstar

Stylish – good value – secure. Document shredders for the workplace or the home.

The perfect solution for every requirement

Confidential documents do not belong in the waste bin but in an HSM document shredder. And remember: the more confidential the data is, the higher the security level needs to be. The particle-cut document shredders from DIN/ISO-security level P-4 onwards are GDPR compliant and offer a sufficiently

high data protection level for most private and commercial users. If you have particularly confidential and secret data with a particularly high protection requirement, we recommend you destroy the data using a machine in security level P-5 to P-7.

Photos of the different particle sizes for the data medium paper.

ISO/IEC 21964 (DIN 66399) – the standard for data protection

1 Define your protection class ...

2 ... which leads to the security levels.

Protection class 1

Normal protection requirements for internal data.

Protection class 2

High protection requirements for confidential data.

Protection class 3

Very high protection requirements for particularly confidential and secret data.

Security level 1

General documents to be rendered illegible or invalidated, for instance old advertising material such as catalogues, brochures.

Security level 2

Internal documents to be rendered illegible or invalidated, for instance internal company communications, such as out-of-date instructions, travel guidelines, notices, forms.

Security level 3

Data media with sensitive and confidential data as well as personal data subject to high protection requirements, e.g. company sales reports and tax documents as well as quotations, orders etc. with private address data.

Security level 4

Data media with sensitive and confidential data as well as personal data subject to high protection requirements, e.g. balances and conditions as well as payslips, personal data/files, work contracts, tax documents.

Security level 5

Data media with confidential information of fundamental importance for a person, company or institution, e.g. medical reports, patents, construction documents, strategic papers, competitor analysis, process documentation.

Security level 6

Data media with confidential documentation requiring extraordinary security precautions, e.g. research and development documents, official areas.

Security level 7

For strictly confidential data with the highest security precautions e.g. secret service or military sectors.

For the secure destruction of personal data we recommend security levels P-4 and above.

To find out exactly which security level is the right one for you, just follow the three steps on these two pages. If you have different types of data media to be destroyed, the one requiring the highest security level is relevant for determining which cutting size you need.

3 Select the data media relevant for you.

Much easier than you would expect: Data protection with HSM!

Now find the right ISO/document shredder for your requirement.

Using the ISO/IEC 21964 (DIN 66399) standard in practice:

TIP!

1. **Determine the protection class** for the data you want to shred.
2. **Select the security level.** The protection class determined then offers you a choice of three security levels. The higher the security level you select, the smaller and therefore the more secure the shredded particles are.
3. **Check what type of data media** you need to deal with. Paper, CDs, magnetic storage, electronic storage, hard drives etc.
4. **Now connect data media and security level.** You can now use this information to select the appropriate document shredder.

Scope of application	Protection class	Security level ISO/IEC 21964 (DIN 66399)	Shredder material	Model
Department 8 to 15 persons Per cycle: up to 80 sheets Collection volume: up to 205 litres	1	P-2/O-2/T-2/E-2		SECURIO: P44i

	P-7	F-7	O-7	T-7	H-7	E-7	

Shredding different types of data media securely.

You have documents with protection class 2 which need to be shredded. You select security level 4, as this involves strictly confidential personal data. The information is on paper and on DVDs, i.e. data media in the P and O categories. You need a document shredder which can shred both media types. The right security level for paper is P-4, and for DVDs O-3. To find the right document shredder, look for the combination P-4/O-3.

Warranties and services

A decisive advantage – HSM service

We are committed to providing excellent service and we are always delighted to help our customers. This not only applies to our headquarters but also to all HSM service centres in Germany, in Europe and all over the world.

Our warranties and services:

- All HSM SECURIO and Pure document shredders come with a warranty on the steel cutting rollers at security levels P-2 to P-5 for the entire lifetime of the machine (HSM Lifetime Warranty).
- Consulting service: individual product consulting, data protection advice, service support and advice on spare part requirements.

- Training and seminars on products, data protection and service.
- Consulting service for all products and data protection queries; please call +49 7554 2100-0 or send an email to info@hsm.eu.

HSM SECURIO document shredders

Are you looking for quality, durability and design? Then you have found the perfect answer with HSM SECURIO document shredders. You can expect the highest level of Made in Germany quality here. Regardless of whether you have chosen the AF-series with automatic paper feed, the C-series for the home office, the B-series for the workplace or the P-series with IntelligentDrive for professional use: you are protected with shredders from HSM!

5
year
warranty

5 year warranty on the HSM SECURIO C-, B- and P-series document shredders in security levels P-2 to P-5 according to ISO/IEC 21964 (DIN 66399). 3 year warranty on all other HSM SECURIO document shredders.

3
year
warranty

cutting roller
warranty

Lifetime warranty on cutting rollers in HSM SECURIO document shredders at security levels P-2 to P-5. Cutting rollers are impervious to staples and paper clips.

Made in
Germany

HSM produces the HSM SECURIO product line in Germany.

The HSM SECURIO document shredders (except AF100 / AF350) have been awarded the Blue Angel for low energy consumption, durable design and the avoidance of materials that are harmful to the environment.

www.blauer-engel.de/uz174

HSM SECURIO document shredders with automatic paper feed

Innovative, convenient and time-saving. The autofeed shredders of the AF-series with Nanogrip Technology combine functionality and operating convenience. For reliable and easy destruction of document stacks and single sheets.

Time-saving and easy to use

Paper stacks of up to 500 sheets can be put into the magazine and destroyed automatically.

Nanogrip Technology

The document shredders with autofeed have specially developed intake and transport rollers which use Nanogrip Technology. This enables sheet after sheet to be pulled in securely from the stack of paper.

Useful dual function

Manual paper feeding is possible during autofeed stack processing.

Lock-and-Go function

It is possible to secure the paper stack inserted into the magazine against unauthorized access by using the Lock-and-Go function (HSM SECURIO AF350 / AF500).

In stand-by mode, the document shredder does not consume any power (HSM SECURIO AF100). EcoSmart: exceptionally low power consumption of 0.1 Watts in stand-by mode (from HSM SECURIO AF150 upwards).

HSM SECURIO AF100 document shredder with automatic paper feed

The simple and convenient method of data destruction for the home or small office. The document shredder with an automatic paper feed shreds stacks of paper of up to 100 sheets as well as single sheets of paper effortlessly whilst saving you time.

- Cutting rollers made of hardened steel with lifetime warranty.
- Paper feed with overload protection reduces paper jams.
- Quiet operation minimises noise development in the workplace.
- Practical automatic start/stop.
- Effortless emptying of the waste container via the removable housing top.
- Level indicator through inspection window.

HSM SECURIO document shredders for the home or small office

Space-saving, efficient and secure. The C-series impresses with its appealing compact design and ease of use. Perfect for document shredding at the office or at home.

Quiet operation

The quiet operation minimises noise development in the workplace.

Anti-paper jam function

The paper feed with overload protection reduces paper jams and sustains the high throughput of paper.

High level of user safety

A slight pressure on the safety element immediately stops the paper feed and prevents unintentional entry into the machine.

Automatic start/stop

The operation is very easy: the device starts automatically when fed paper and automatically stops after shredding is complete.

The document shredder uses no electricity in stand-by (HSM SECURIO C14/C16).

EcoSmart: exceptionally low power consumption of 0.1 Watts in stand-by mode (from HSM SECURIO C18 upwards).

HSM SECURIO C14 document shredder

Space-saving, quiet and reliable: the shredder for your home office. No power use in stand-by, has a high degree of user safety – and all of this in a great, modern design.

- Cutting rollers made of hardened steel with lifetime warranty.
- Effortless emptying of the waste container via the removable housing top.

HSM SECURIO document shredders for the workplace

Economical, reliable and versatile. The B-series impresses with its high level of performance and maximum functionality. The product range offers document shredders for the workplace or small working groups of up to five people.

Solid steel cutting rollers

The induction-hardened, solid steel cutting rollers with a lifetime warranty in security levels P-2 to P-5 can easily cope with staples and paper clips and guarantee durability.

For continuous operation

The powerful motor ensures a high cutting capacity and reliable continuous operation.

High level of user safety

The safety element prevents unintentional entry of materials into the machine and thereby increases user safety.

Automatic start/stop

The operation is very easy: An integrated light barrier automatically starts the device when paper is introduced into the feed and it automatically stops after shredding is complete.

EcoSmart: exceptionally low power consumption of 0.1 Watts in stand-by mode.

For a consistently high cutting performance, this low maintenance document shredder has an external automatic oiler as an option (from HSM SECURIO B24 upwards).

HSM SECURIO B22 document shredder

Data security made easy! The powerful entry level model of the B-series for the workplace. With automatic start/stop and overload protection. The waste container can be easily removed and emptied.

- Quiet operation minimises noise development in the workplace.
- Paper feed with overload protection reduces paper jams.
- Multifunction element for intuitive operation.
- A full bin is indicated optically and the removable waste container can be emptied effortlessly.
- Level indicator through inspection window.

HSM SECURIO document shredders for the department

Data destruction at the highest level. The shredders in the Professional series are equipped with the impressive and innovative IntelligentDrive motor and operating technologies – up to 40 % more performance, intelligent prevention of paper jams and a reduced operating noise level. Perfect for large working groups of up to fifteen people.

Touch display

Intuitive operation and multi-language menu selection via the high resolution 4,3" touch display.

IntelligentDrive

The innovative IntelligentDrive motor and operating technology offers Silent, Standard and Performance operating modes for destroying data efficiently and conveniently.

45 dB(A)
in Silent Mode

Super Silent

You will be amazed! In Silent operating mode, the document shredder is up to 30 % quieter than in Standard operating mode – and therefore by far our quietest document shredder!

Intelligent paper jam prevention

The machine recognises very quickly if too much paper has been fed in and reacts autonomously.

EcoSmart: exceptionally low power consumption of 0,1 Watts in stand-by mode.

This maintenance friendly document shredder has an **integrated automatic oiler** which ensures that you have a consistently high cutting capacity.

HSM SECURIO P36i document shredder

Top class, professional data destruction! This document shredder impresses with its innovative IntelligentDrive motor and operating technology and incorporates a touch screen display. Perfect for large working groups of up to fifteen people.

Option + N

Separate OMDD cutting unit and metal detection

The document shredder can be equipped with a metal detector as an option. The automatic switch-off means that damage to the cutting unit from paper clips or other metal parts can be avoided.

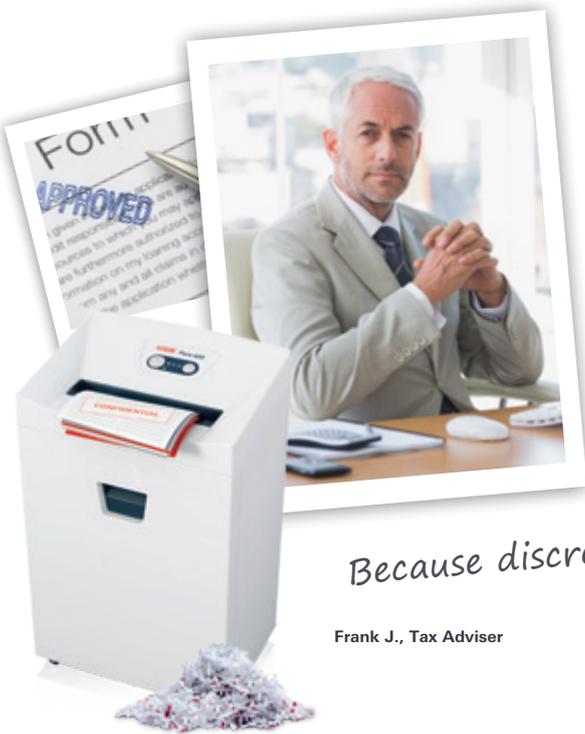

HSM – My document shredder

Each one of us has a good reason to destroy old documents.

The students, starting out on their professional careers who want to get rid of training or study documents; the employee who finally wants to have his own company and who wants to protect his business concept; the artisan who wants to ensure

his old quotes, receipts and invoices are securely destroyed. Each of them needs exactly the right document shredder. And HSM has it!

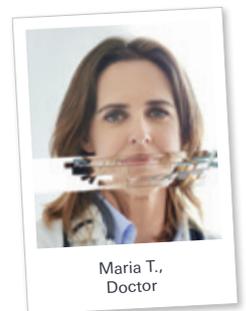

HSM – My document shredder.

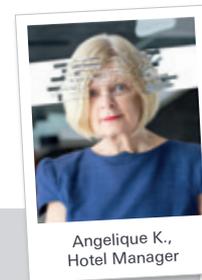

Because discretion is vital.

Frank J., Tax Adviser

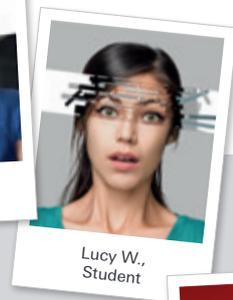

Find the document shredder which suits you!

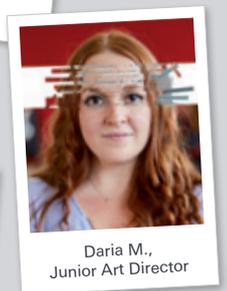

Maria T., Doctor

Angelique K., Hotel Manager

Lucy W., Student

Daria M., Junior Art Director

Shred – don't bin. With HSM document shredders.

Stefan K., Carpenter

Why did it have to be me?
I disposed of my designs in the waste paper container. Years later I found the furniture items that I designed being sold in a furniture store. It's the first and last time that happens to me! From now on, all my designs and sketches will go straight into an HSM document shredder.

Why did it have to be me?
A routine annual audit conducted by our data protection officer revealed that our processes did not comply with the EU-GDPR provisions. It's the first and last time that happens to me! From now on, all hard copies which are no longer needed will go straight into an HSM document shredder.

Mei Wong, Personnel Manager

Dr. Albert E., Laboratory Manager

HSM Pure document shredders

The innovative HSM Pure document shredder line is not only the epitome of reliability because of its proven "Made in Germany" quality and solid construction, it also impresses with its timeless modern design and easy operation. With a clever combination of traditional engineering and modern design, the shredder range from compact units that sit next to a desk to large powerful document shredders for working groups and entire departments. Document shredders from the HSM Pure product range are the perfect data protection companions.

5

year
warranty

5 year warranty on the HSM Pure document shredders.

cutting roller
warranty

Lifetime warranty on cutting rollers in HSM Pure document shredders. Cutting rollers are impervious to staples and paper clips.

Made in
Germany

HSM produces the HSM Pure product line in Germany.

HSM Pure document shredders for the home or the small office

Unbelievably compact. Always a top performance.
HSM Pure document shredders for the home or the small office. For people who have to shred confidential documents at their desks.

Quiet operation

The quiet operation minimises noise development in the workplace.

Automatic start/stop

The operation is very easy: the device starts automatically when fed paper and automatically stops after shredding is complete.

Anti-paper jam function

The paper feed with overload protection reduces paper jams and sustains the high throughput of paper.

High level of user safety

A slight pressure on the safety element immediately stops the paper feed and prevents unintentional entry into the machine.

The stand-by feature ensures a high degree of energy saving when the shredder is not in use.

HSM Pure 120 document shredder

Data protection begins at the desk. The compact document shredder shreds personalised advertising, correspondence of all kinds, receipts and payment documents safely and reliably.

- Cutting rollers made of hardened steel with lifetime warranty.
- Effortless emptying of the waste container via the removable housing top.

HSM Pure document shredder for the centralised destruction of data media

Particularly easy. Uniquely practical. The high-performance HSM Pure 740 max document shredder is designed for shredding large amounts of paper.

Quiet continuous operation

The powerful motor ensures a high cutting capacity and reliable continuous operation.

External oiler

For a consistently high cutting performance, this low maintenance document shredder has an external automatic oiler.

Convenient emptying

Convenient emptying thanks to the high-quality wooden cabinet with door and pull-out reusable collecting bag.

Alternative waste bin

Mobile 240 litre waste bin can be integrated, in accordance with DIN EN 840 (not included as standard).

The stand-by feature ensures a high degree of energy saving when the shredder is not in use.

A slight pressure on the safety element immediately stops the paper feed and prevents unintentional entry into the machine.

HSM Pure 740 max document shredder

The strong document shredder with a 240 litre bin for demanding in-house data destruction. The robust shredder has a powerful cutting unit with a wide feed-in opening for formats up to DIN A3.

- Cutting rollers made of hardened solid steel with lifetime warranty.
- Paper feed with overload protection reduces paper jams.
- Light barrier for automatic start/stop.
- Optimum stability due to glide feet.
- High quality wooden cabinet with door and steel reinforced base plate against wear.
- Optical display and shut down if the bin is full.
- Correct removal and disposal of the cut material using the particle distributor to disperse the waste material evenly.

The direct way to more security

Ensure your data security yourself!

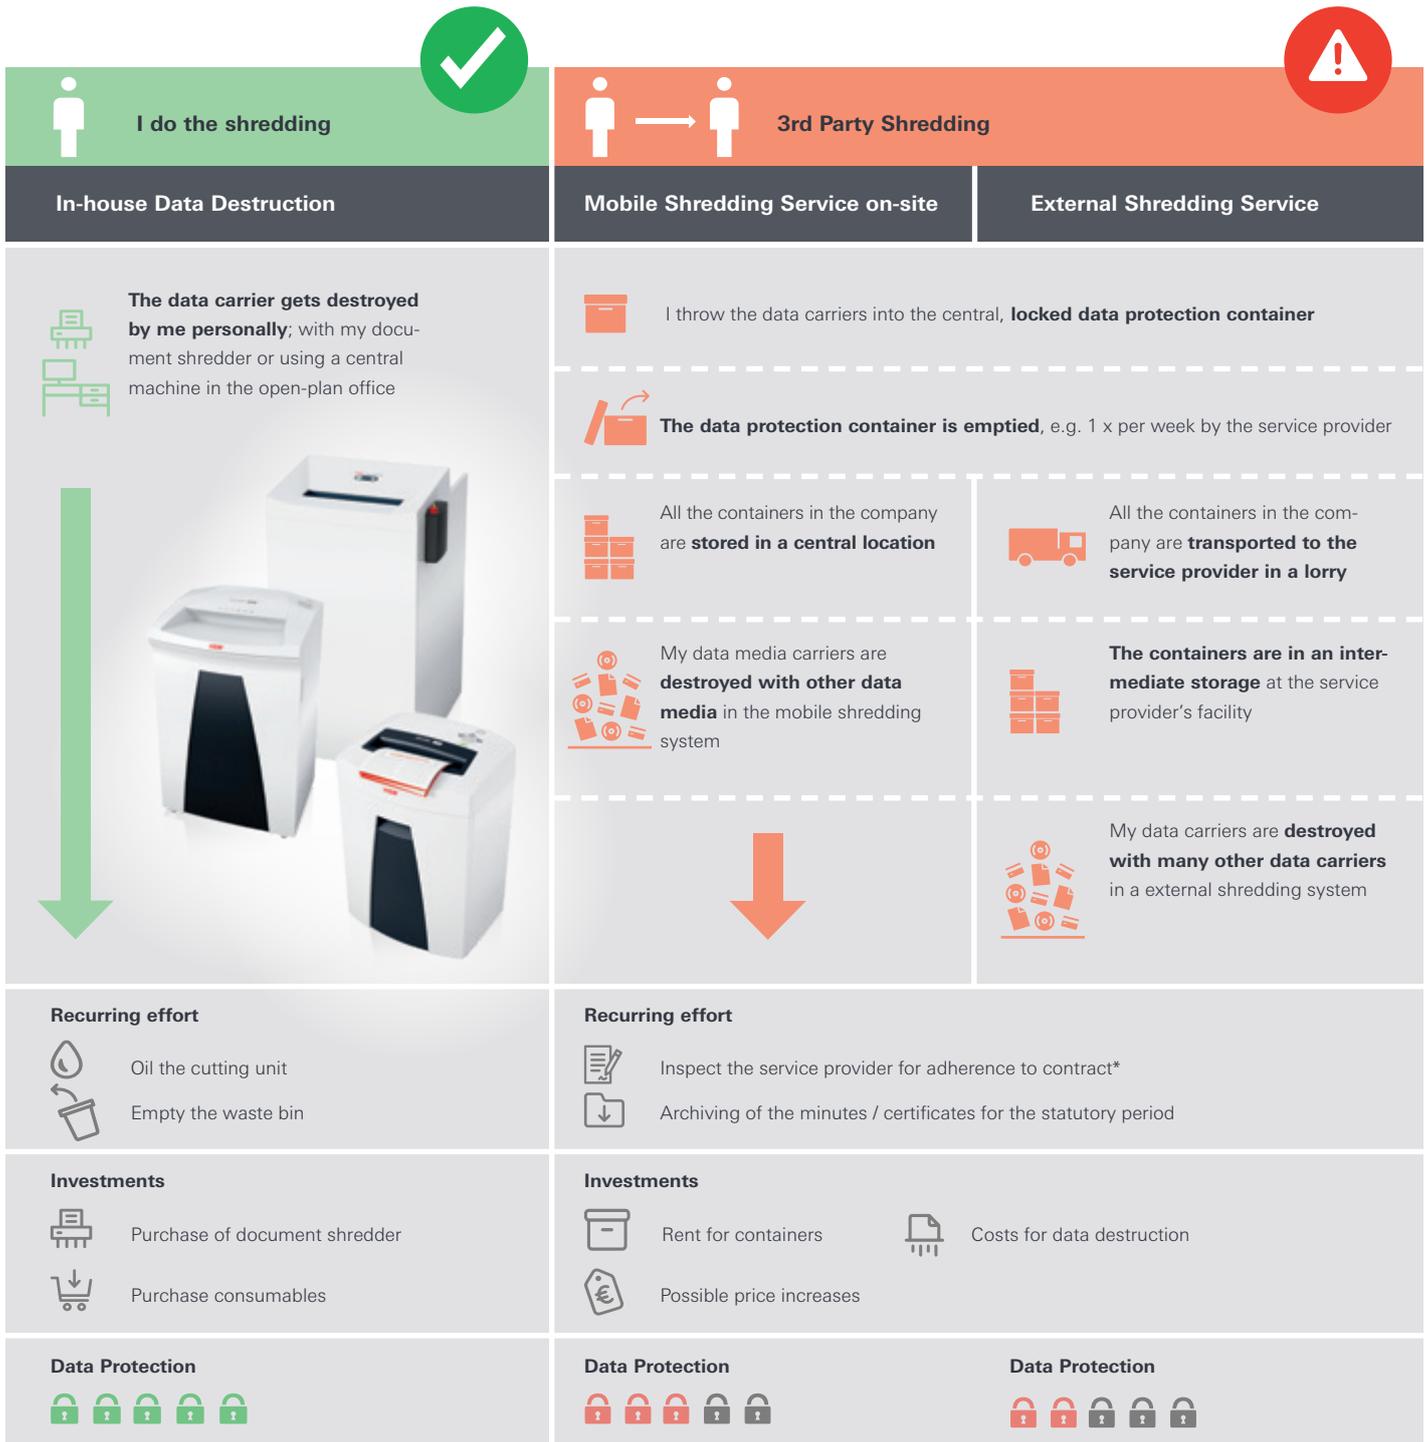

Many companies are too quick to choose an external service provider when faced with the question of destroying data either inside the company or externally.

What is often overlooked: **the company is still liable – even if the service provider is clearly at fault.***

Moreover – the more stages and hands a storage device goes through, the more likely unauthorized access will occur. The efforts and the costs for external destruction are often underestimated. Do your own comparison!

Security, effort and costs – all favour internal data destruction.

The stages of my data carrier's journey, using an application example.

*In accordance with Clause 5 Para 2, Clause 24 Para 1, Clause 28 Para 1, Para 3 sub-para h, Clause 32 Para 1, sub-para b and d and Clause 82 Para 2 of the General Data Protection Regulation (GDPR). No responsibility is accepted for the accuracy of this information.

HSM shredstar document shredders

Data privacy concerns everyone! So shred sensitive data at the office or at home with a document shredder from the HSM shredstar series. These devices are characterised by their compact and modern design, their high level of performance and ease of use with an unbeatable price-performance ratio.

HSM shredstar document shredders for the home or small office

Stylish – good value – secure. The HSM shredstar document shredders for the home or small office. For people who want to shred documents securely.

Separate CD cutting unit

The separate CD cutting unit easily shreds CDs and DVDs, credit and store cards. The shredded material is sorted into the separate CD waste container and can be disposed of separately.

Quiet operation

The quiet operation minimises noise development at the workplace.

Automatic start/stop

The operation is very easy: the device starts automatically when fed paper and automatically stops after shredding is complete.

Anti-paper jam function

The automatic reverse eliminates paper jams and ensures a smooth operation.

HSM shredstar S10 document shredder

Data protection for everyone. This modern and compact strip cut document shredder with a separate CD cutting unit destroys your data reliably and quietly, both at home or in a small office.

- LED indicator shows the device's operating status: Power, Overload, Overheat.

Anti-paper jam function

The automatic reverse eliminates paper jams and ensures a smooth operation.

160 W 20 l 220 mm

HSM shredstar X6pro document shredder

Reliable and user-friendly particle cut document shredder with the highest security level in the shredstar line. With a separate CD cutting unit for use at the workplace.

- LED indicator shows the device's operating status: Power, Overload, Overheat, Bin full.
- Light barrier for automatic start/stop.
- Level indicator through inspection window.
- Effortless emptying of the waste container via the removable housing top.

HSM shredstar document shredders for the workplace

Stylish – good value – secure. The HSM shredstar document shredders for the workplace. For people who need to shred paper documents and digital media securely.

Separate CD cutting unit

The separate CD cutting unit easily shreds CDs and DVDs, credit and store cards. The shredded material is sorted into the separate CD waste container and can be disposed of separately.

Functional and clear

The LED indicator shows the device's operating status: Power, Overload, Overheat, Bin full, Door open.

Effortless emptying

The waste container can be easily removed and emptied.

Mobile on castors

There are castors on the document shredder so it is easy to move around.

HSM shredstar X12pro document shredder

Reliable and secure. This particle cut document shredder on castors has the highest security level for shredding data in the shredstar range. With a separate CD cutting unit for use at the workstation.

- Automatic reverse eliminates paper jams.
- Quiet operation minimises noise development at the workplace.
- Optical display and shut down if the bin is full.
- Light barrier for automatic start/stop.
- Level indicator through inspection window.

HSM Powerline heavy duty document shredders

Data privacy in a big way – the HSM Powerline: the robust technology of the three-phase devices is specially designed for a large throughput and long total operating time. The top of the range model HSM Powerline FA 500.3 processes bound documents and folders up to 550 sheets at a time. The powerful heavy duty document shredders are perfect for large archives or as a central station for document shredding.

Made in
Germany

HSM produces the HSM Powerline heavy duty document shredders in Germany.

The heavy duty document shredders of the HSM Powerline product family meet the highest security standards.

HSM Powerline heavy duty document shredders for the centralised destruction of data media

Convenient and simple. HSM Powerline heavy duty document shredders, designed for applications destroying large quantities of data media.

Solid steel cutting rollers

The induction-hardened, solid steel cutting rollers are robust and ensure a high level of durability.

Continuous operation

The powerful motor ensures a high cutting capacity and reliable continuous operation.

Functional operator control panel with LED indicator

The operating status of the heavy duty document shredder is shown clearly on the control panel.

Convenient working height

Data media can be processed at a convenient working height.

User safety through emergency off switch

It may be necessary to stop the machine immediately so we have equipped the device with an emergency off switch.

Effortless emptying

Effortless emptying via a removable trolley with a reusable collecting bag.

Low space requirement and narrow transport width

Thanks to the integrated rollers and compact size, the machine can be easily set up at the installation site and saves space.

Mobile on castors

The device can be used on a mobile basis and has smooth-running, stable castors with a parking brake.

Accessories

Loading table extension

The optional extension to the loading table provides more space to store materials.

Additional collecting trolley for shredder material

To ensure a continuous shredding process, an additional collecting trolley can be ordered for the shredder material.

Discharge conveyor belt

The discharge conveyor belt makes the collection of the shredded material easy and convenient. Any standard container can be used to collect the material at the end of the conveyor belt.

Dust extractor

The powerful and energy efficient HSM DE 4-100 dust extractor in dust classification M ensures an optimal extraction due to the high air flow volume, thereby reducing dust emissions.

HSM
Consumable materials

HSM Powerline shredder baler combinations

The shredder baler combinations are complete, compact waste disposal stations. They provide data security up to security level P-5 and compress the shredded material into bales, which can be easily transported and recycled. The HSM shredder baler combinations are built for shredding large quantities.

Made in
Germany

HSM produces the HSM Powerline shredder baler combinations in Germany.

The HSM Powerline shredder baler combinations meet the highest security standards.

HSM Powerline compact disposal stations for industrial applications

Convenient and economic. The HSM Powerline shredder baler combinations are for heavy duty applications shredding large quantities of data.

Solid steel cutting rollers

The induction-hardened, solid steel cutting rollers are robust and ensure a high level of durability.

Continuous operation

The powerful motor ensures a high cutting capacity and reliable continuous operation.

Functional operator control panel with LED indicator

The operating status of the shredder baler combination is shown clearly on the control panel.

Convenient working height

Data media can be processed at a convenient working height.

User safety through emergency off switch

It may be necessary to stop the machine immediately so we have equipped the device with an emergency off switch.

Clean handling

The shredded material which has been compressed into compact bales can be cleanly disposed of either in a box (HSM SP 4040 V) or a waste bag (HSM SP 4040 V, HSM SP 5080). These prevent particles from falling out and ensure clean handling.

Bale weight can be manually set

The bale weight is variable and depends on your requirement (HSM SP 5080, HSM SP 5088).

Simple commissioning

The combination can be commissioned very easily using Plug-and-Play. The conveyor belt shredder can therefore be combined with a baling press at any time.

Accessories

Loading table extension

The optional extension to the loading table provides more space to store materials.

Pallet holder

The pallet holder keeps a euro pallet in place so that the finished bale can be ejected and taken away easily and quickly.

Dust extractor

The powerful and energy efficient HSM DE 4-100 dust extractor in dust classification M ensures an optimal extraction due to the high air flow volume, thereby reducing dust emissions.

HSM Powerline compact disposal stations for industrial applications

Solid steel cutting rollers

The induction-hardened, solid steel cutting rollers are robust and ensure a high level of durability.

Continuous operation

The powerful motor ensures a high cutting capacity and reliable continuous operation.

Functional operator control panel with LED indicator

The operating status of the shredder baler combination is shown clearly on the control panel.

Convenient working height

Data media can be processed at a convenient working height.

The HSM Powerline shredder baler combinations meet the highest security standards.

4/2.2 kW

428 mm

HSM Powerline SP 4040 V shredder baler combination

This compact combination of the FA 400.2 heavy duty document shredder and a vertical baling press is designed for the professional destruction of large quantities of documents, which are then compressed into bales of up to 35 kg.

- Convenient material feeding via non-slip conveyor belt.
- Continuous operation is possible thanks to the powerful motor with a chain drive.
- Energy efficiency class IE3 compliant motors.
- Light barrier for automatic start of the compression process.
- Automatic return eliminates paper jams.
- Practical removal trolley for the easy removal of bales.
- Cross cut shredder baler combinations have a manual oiler.
- Mobile on castors, with parking brake.

500 mm

HSM Powerline SP 5088 shredder baler combination

With this waste disposal station, HSM combines the FA 500.3 heavy duty document shredder with a channel baler press. It is therefore perfect for use in archives or central stations for shredding large quantities of documents, which are then compressed into bales of up to 90 kg.

- Convenient material feeding via non-slip conveyor belt.
- Continuous operation is possible thanks to the powerful motor with a chain drive.
- Energy efficiency class IE3 compliant motors.
- Automatic return eliminates paper jams.
- Simple commissioning of the combination using Plug-and-Play.
- Light barrier for automatic start of the compression process.
- Shredded material is compressed into compact bales, which are manually tied off with three baler straps and can also be disposed of cleanly in a waste bag.
- The bale weight is variable depending on the requirement.
- Automatic oiler provides for consistently high cutting capacity.
- User safety through emergency off rail.
- Multifunction element for intuitive operation.
- Mobile on castors, with parking brake.

HSM StoreEx digital data media shredders

Be careful when disposing of digital storage media! Huge amounts of confidential information are stored on our computers, USB sticks, magnetic tapes, CDs, DVDs and Blu-ray discs, credit cards and loyalty cards. But what happens to these storage devices when they are no longer required? The solution is mechanical destruction! The HSM StoreEx digital data media shredders shred digital and magnetic media into tiny particles, making recovery practically impossible. Safe and efficient to use, data protection compliant.

Made in
Germany

HSM produces the HSM StoreEx digital data media shredders in Germany.

The only way to destroy confidential data securely and reliably

The HSM StoreEx digital data media shredders destroy optical, magnetic and electronic storage media in a secure and economical way.

Solid steel cutting rollers

The induction-hardened, solid steel cutting rollers are robust and ensure a high level of durability.

Continuous energy-saving operation with low noise level

This powerful machine provides an excellent cutting performance combined with reliable continuous operation and a low noise level.

Convenient operation via the membrane keypad

The selection of the correct functional mode will always ensure maximum throughput for the respective material type, HSM StoreEx HDS 150/230.

Continuous input of media

The large and clearly visible LED display enables the continuous input of media at a comfortable working height, HSM StoreEx HDS 150/230.

For decentralised destruction

Data media can be shredded easily in decentralised locations with this machine, HSM StoreEx HDS 150/230.

Material anti-jam function

The automatic reverse function rectifies material jams and ensures smooth shredding operations, HSM StoreEx HDS 150/230.

Low maintenance

The digital data media shredder has a closed direct drive unit and is therefore a low maintenance machine, HSM StoreEx HDS 150/230.

User safety through emergency off switch

It may be necessary to stop the machine immediately so we have equipped the device with an emergency off switch, HSM StoreEx HDS 150/230.

Accessories

Material feed conveyor belt

A conveyor belt can be used for a continuous material feed into the digital data media shredder.

Hand scanner

The data media to be destroyed is registered and documented easily and quickly using a hand scanner.

Camera surveillance system

The high resolution camera surveillance system records the data media to be destroyed and documents the whole shredding process from the input to the final destruction.

Dust extractor

The powerful and energy efficient HSM DE 4-240 dust extractor in dust classification H ensures an optimal extraction due to the high air flow volume, thereby reducing dust emissions.

HSM StoreEx digital data media shredders: the only way to destroy confidential data securely and reliably

Solid steel cutting rollers

The induction-hardened, solid steel cutting rollers are robust and ensure a high level of durability.

Continuous energy-saving operation with low noise level

This powerful machine provides an excellent cutting performance combined with reliable continuous operation and a low noise level.

Convenient operation via the membrane keypad

The selection of the correct functional mode will always ensure maximum throughput for the respective material type, HSM StoreEx HDS 150/230.

LED display for continuous input of media

The large and clearly visible LED display enables the continuous input of media at a comfortable working height, HSM StoreEx HDS 150/230.

HSM StoreEx OMDD 130 digital data media shredder

This digital data media shredder is specifically designed for the shredding of CDs/DVDs and credit cards with the highest security requirements.

- Digital data media shredder with single-phase power connection.
- High quality materials and "Made in Germany" quality for safety and durability.
- Cutting rollers made of hardened solid steel.
- Powerful, energy-saving power unit enables long operation.
- High degree of energy saving due to stand-by.
- The device automatically switches off if pressure is applied to the safety element.
- Safety element prevents unintentional entry and serves as a splinter shield.
- Light barrier for automatic start/stop.
- An automatic reverse rectifies material jams.
- Optical display and shut down if the bin is full.
- Can be moved on castors.

HSM StoreEx HDS 150 digital data media shredder

The HSM StoreEx HDS 150 digital data media shredder destroys digital media devices in a safe and economical way – and is data protection compliant as well.

- The HSM StoreEx HDS 150 destroys data carriers completely securely and reliably at security level "H-3 security cut".
- Digital data media shredder with single-phase power connection.
- Removable waste container for effortless emptying.
- For the decentralised destruction of data media.
- An automatic reverse rectifies material jams.
- Low maintenance due to closed direct drive unit.
- Mobile on castors, with parking brake.

HSM StoreEx HDS 230 digital data media shredder

Secure, data protection compliant and economical. This digital data media shredder shreds digital data carriers into little particles and makes data recreation virtually impossible.

- Removable waste container for effortless emptying (model with removable waste container).
- Discharge conveyor belt for transporting material on the right or left (model with discharge conveyor belt).
- For the decentralised destruction of data media.
- Time-saving direct input of CDs/loyalty cards.
- An automatic reverse rectifies material jams.
- User safety due to emergency off switch.
- Low maintenance due to closed direct drive unit.
- Small footprint thanks to the compact design.
- The control cabinet is easily accessible from the front of the machine.
- Mobile on castors, with parking brake.

HSM DE 4-240 dust extractor

The powerful and energy efficient dust extractor in dust classification H ensures optimal extraction due to the high air flow volume, thereby significantly reducing the emission of substances which are a health hazard. The model is suitable for connection to the HSM StoreEx HDS 230 digital data media shredder, in both the single and dual stage variant.

- High quality materials and "Made in Germany" quality for safety and durability.
- Cabinet design with small footprint.
- Quiet operation minimises noise development in the workplace.
- Low operating costs due to cleanable long life cartridge filters.
- Filter cleaning is carried out fully automatically.
- Filter protection due to the pre-separation of coarse dust particles by the impact separator.
- Easy disposal of dust using the bin in the dust collection drawer.
- Practical automatic start/stop.
- Mobile on castors, with parking brake.

HSM ProfiPack packaging machines

From waste to packaging material! The packaging machines are a brilliant solution for all shipping and storage areas. They perforate used cardboard or bolster it up and make universally usable packaging material which is as good as new. This saves costs and, at the same time, is a sensible and practical contribution to environmental protection.

Solid steel cutting rollers

The induction-hardened, solid steel cutting rollers are robust and ensure a high level of durability.

Continuous operation

The powerful motor ensures a high cutting capacity and reliable continuous operation.

Adjustable working width

The infinitely variable adjustment of the working width with a scale allows the production of cushioning material exactly as required.

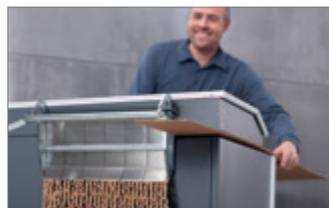

Variable cushioning volume

Depending on the application, the cushioning volume of the packaging material can be adjusted as required.

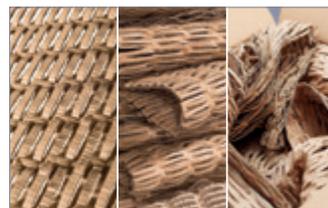

HSM produces the HSM ProfiPack packaging machines in Germany.

One work process to cut and perforate

Cutting and bolstering in one work process.

High-quality packaging material

The packaging material can be used wherever required and provides an optimum protection for objects.

Perfectly packed – with HSM ProfiPack

Safely pack different objects easily and save time as well.

HSM ProfiPack C400 packaging machine

With this packaging machine, you can process cardboard into a padding mat or padded filling material in one working step. As a compact tabletop device, it can be used as a mobile device with total flexibility.

- Intuitive operation with LED indicators on a robust keypad.
- Recessed handle for easy lifting of the device.
- Integrated turbo-function resolves blockages.
- Non-slip stand of the packaging machine.

Image similar

HSM ProfiPack P425 packaging machine

This high-performance packaging machine is used to process a number of layers of cardboard into a padding mat or padded filling material. The professional device is mobile on steering rollers and can be used with total flexibility.

- Particularly sustainable operation due to the high efficiency.
- Fully flexible feed-in speed adjustment (model with single-phase power plug).
- Infinitely adjustable working width with scale for cushioning material made to measure.
- Intuitive operation with LED indicators on a robust keypad.
- User safety through emergency off switch.
- Integrated turbo-function resolves blockages (model with single-phase power plug).
- Mobile on castors, with parking brake.

Model incl. adapter set for dust extractor

- Connection for dust suction.
- Dust extractor for dust-free working environment (optional).

HSM DE 1-8 dust extractor

The compact and powerful dust extractor in dust classification M is the perfect addition for clean operations with the HSM ProfiPack P425 packaging machine. Cardboard and dust particles are extracted reliably.

- High quality materials and "Made in Germany" quality for safety and durability.
- Compact and space-saving design.
- Quiet operation minimises noise development in the workplace.
- Low operating costs due to cleanable long life cartridge filters.
- Pulse-jet filter cleaning nozzle for easy cleaning of the long life filter cartridges.
- Easy disposal of dust using the bin in the dust collection drawer.
- Handle enables mobile use.

Notes on the technical details

Document shredders:

Cutting type:	The material is shredded into either strips or particles.
Cutting size in mm:	Dimension of the strips or particles of the shredded material (depending on the paper quality).
Cutting capacity in sheets:	The maximum number of sheets (DIN A4, 80 g/m ²), fed lengthways, which can be cut in one cycle. The performance data is determined when the motor is cold and the cutting device is freshly oiled. A weaker mains voltage or a different mains frequency to the one specified could result in less sheet capacity and increased noise during operation. The sheet capacity can vary depending on the structure and properties of the paper and on the way it is fed in. The performance data is calculated with paper of 80 g/m ² .
Security levels:	According to ISO/IEC 21964-1 (DIN 66399-1).
OMDD:	The OMDD (Optical Media Destruction Device) cutting unit shreds CDs and DVDs and is recommended for shredding confidential information by the Federal Office for Information Security.
Intake/working width in mm:	Maximum effective width of the feed opening.
Motor:	Max. power consumption of the shredder for cutting capacity with sheets of 80 g/m ² . Rated power of document shredder drive motor.
Voltage/frequency:	AC mains supply.
Dimensions (W x D x H):	External dimensions of the machine when set up for operation.
Weight in kg:	Net weight of the machine without packaging.
Container/collection volume:	Volume of waste container or collection capacity for cut material before the machine switches off.

Shredder baler combinations:

Pressing power:	Piston cylinder surface multiplied by the maximum hydraulic pressure (theoretical value).
Motor:	Rated power of document shredder and baling press drive motors.
Max. bale size (W x H x L):	The length of the bales varies depending on the expansion force of the compressed material.
Dimensions (W x D x H):	External dimensions of the machine when set up for operation.
Weight in kg:	Net weight without packaging, loaded material, feeding system or options.

Packaging machines:

Effective width in mm:	The maximum effective width of the feed opening.
Infeed height in mm:	Height of the intake opening.
Cutting capacity:	The number of layers of cardboard which can be cut in one cycle.
Cutting speed in mm/s:	This is calculated on the basis of the external diameter and speed of the cutting rollers in idle operation.
Motor:	Max. power consumption of the machine for cutting capacity / in layers
Voltage/frequency:	Three-phase/alternating current power supply.
Dimensions (W x D x H):	External dimensions of the machine when set up for operation.
Weight in kg:	Net weight of the machine without packaging and options.

Digital data media shredders:

Cutting capacity:	Max quantity of hard drives which can be shredded in one hour.
Cutting size in mm:	The dimensions of the particles that result from shredding the material.
Motor:	Rated power of digital data media shredder drive motor.
Voltage/frequency:	Three-phase/alternating current power supply.
Dimensions (W x D x H):	The external dimensions of the machine when set up for operation.
Weight in kg:	The net weight of the machine, without packaging and options.
